JMIR Research Protocols

Protocols, grant proposals, registered reports (RR1).

Open access | Peer reviewed | PubMed, PubMed Central (PMC), MEDLINE, Sherpa/Romeo, DOAJ, Scopus, WoS/ESCI, and EBSCO indexed

JMIR Research Protocols publishes peer-reviewed, openly accessible research ideas, grant proposals, study protocols, and trial protocols (also known as Registered Report Stage 1 papers). *JMIR Research Protocols* publishes protocols and grant proposals from all areas of medicine and health research, including wet lab methods. This journal supports scientists in publishing their protocol as an early scientific record when reporting on developments of novel methodologies, software, or innovations.

By publishing your protocol in *JMIR Research Protocols*, you also encourage collaboration, reduce duplication of scientific effort, and demonstrate to future reviewers that your subsequent results paper adheres to carefully developed a priori methods. This demonstrates a commitment to transparency and scientific rigor, helping to make research more reproducible and combat publication bias. Publishing a *JMIR Research Protocols* paper also offers authors a seamless path for subsequent publication of their results (also known as Registered Report Stage 2 papers) in a JMIR Publications journal.
