JMIR Serious Games

A multidisciplinary journal on gaming and gamification including simulation and immersive virtual reality for health education/promotion, teaching, medicine, rehabilitation, and social change.

Open access | Peer reviewed | PubMed, PubMed Central, DOAJ, Scopus, SCIE (Clarivate), and PsycINFO indexed

Q1 Health Care Sciences & Services

Q1 Public, Environmental & Occupational Health

** Highest quartile ranking in top-ranked JCR category*

JMIR Serious Games is a leading multidisciplinary journal focused on the intersection of serious games, gamification, simulation, and immersive virtual reality with real-world applications. We publish cutting-edge research on how computer, web, mobile, VR, and wearable technologies can address critical challenges in health education and promotion, teaching, medicine, rehabilitation, and social change. This includes innovative approaches to health behavior change, exergaming for physical activity, diagnostic and treatment solutions for psychological or psychiatric disorders, and game-based learning.

While maintaining a strong core focus on health, *JMIR Serious Games* also highlights research exploring serious games in health-adjacent or other interdisciplinary contexts. The journal publishes work that examines serious game applications in areas such as military training, education, industrial settings, and workplace applications.
