Journal of Participatory Medicine

Co-production in research and healthcare, technology for patient empowerment and fostering partnership with clinicians.

Open access | Peer reviewed | Sherpa/Romeo, DOAJ, PubMed, PubMed Central, Scopus, and EBSCO indexed

The *Journal of Participatory Medicine* advances the science of meaningful individual participation in both research and healthcare delivery, and the transformative use of technology to empower patients and citizens. The journal focuses on co-production, participatory design, participatory research and education methods, technology for patient self-care, cultivating strong patient-clinician partnerships, enhancing patient and caregiver experiences, and advancing the field of citizen science.

As a fully open-access journal, the *Journal of Participatory Medicine* serves a global community of scientists, educators, clinicians, advocates, patients, and the wider public. We welcome submissions that explore innovative ways to foster collaboration and empower individuals throughout their health journey. We proudly publish diverse content, including original research, reviews, insightful viewpoints, compelling case studies, and evocative essays. A unique feature of the journal is the inclusion of perspectives written by patients and caregivers. Our "Extraordinary Lives" section further honors individuals who have exemplified the spirit of participatory medicine, highlighting their profound contributions.

i The *Journal of Participatory Medicine* is also the official journal of the Society for Participatory Medicine.

Where better to publish about participatory design methods than in the Journal of Participatory Medicine. We felt that it was a great fit and that it would really help us find our audience.

– Adriana Arcia,
University of San Diego
