JMIR Cardio

Cardiovascular medicine with focus on electronic, mobile, and digital health approaches in cardiology and for cardiovascular health.

Open access | Peer reviewed | PubMed, PubMed Central (PMC), Sherpa/Romeo, DOAJ, MEDLINE, and Scopus indexed

Q2 Cardiac & Cardiovascular Systems

* Highest quartile ranking in top-ranked JCR category

JMIR Cardio publishes peer-reviewed scientific work on electronic, mobile, and digital health approaches in cardiovascular medicine and health. This includes eHealth and mHealth strategies for the prediction, prevention, management, treatment, rehabilitation of a wide range of cardiovascular, cardiopulmonary, and cardiometabolic conditions. Examples of subject areas in *JMIR Cardio* include e-Cardiology, telecardiology and remote monitoring, and mobile apps and sensors in cardiology. Additionally, analytics and interventions that encompass the spectrum of primary, secondary, and tertiary prevention of cardiovascular and related conditions are of interest for *JMIR Cardio*. The journal also publishes relevant innovations in patient education and self-management, advanced cardiac disease management, cardiac surgical or postprocedural innovations, cardiac rehabilitation, and specialty medical education and fellowship training.
