Advancing Digital Health & Open Science

About JMIR Publications

Founded in 1999

JMIR Publications was one of the first born-digital open access publishers and is a strong supporter of open science in all forms. Our portfolio of academic journals and innovative scientific communication products focus on the intersection of medicine, health, and technology.

We maintain a commitment to quality and transparency, offering seamless preprinting of manuscripts with the option for public review, premium in-house copy editing services, and a strong reputation for constructive peer review. The *Journal of Medical Internet Research*, JMIR Publications' flagship publication, is one of the leading digital health journals globally in the medical informatics category and the largest in the field.

Timeline of JMIR Innovations

- **1999** | *Journal of Medical Internet Research* is founded as the **first open access** (OA) medical informatics journal and is the most **reputable** journal in the field today.
- **2009** | JMIR Publications is the first publisher posting submissions to a **preprint server** for public review.
- JMIR is a co-founder of the Open Access Scholarly Publishers Association (OASPA). Dr Eysenbach is its first board member.
- **2011** | *Journal of Medical Internet Research* is the first journal globally to systematically collect **social media-based signals**.
- **2019** | JMIRx, one of the first overlay journals, is launched with a mission to collect the **best, freely available** work across health care from the most reputable preprint servers and through traditional submissions.
- **2022** | *JMIRx Med* is accepted for indexing in **PubMed Central (PMC)** and **PubMed**.
