

JMIR Public Health and Surveillance

A multidisciplinary journal that focuses on the intersection of public health and technology, public health informatics, mass media campaigns, surveillance, participatory epidemiology, and innovation in public health practice and research.

* Highest quartile ranking in top-ranked JCR category

Open access | Peer reviewed | Clarivate (SCIE, SSCI etc), Scopus, PubMed, PubMed Central, MEDLINE, Sherpa/Romeo, DOAJ, Embase, CABI, and EBSCO/EBSCO Essentials indexed

Public, Environmental, & Occupational Health

ISSN 2369-2960

JMIR Public Health and Surveillance focuses on the intersection of public health and technology, featuring innovations in the field across all aspects of public health practice and research. The journal publishes cutting-edge public health research, for example, including: public health informatics, surveillance systems and rapid reports, participatory epidemiology, digital disease detection, digital epidemiology, electronic public health interventions, mass media/social media campaigns, health communication, and emerging population health analysis systems and tools.

JMIR Public Health and Surveillance is dedicated to supporting rapid open data sharing, including the publication of rapid or real-time surveillance reports and open data, and during public health emergencies.
