JMIR Medical Informatics

Clinical informatics, decision support for health professionals, electronic health records, and eHealth infrastructures.

Open access | Peer reviewed | MEDLINE, PubMed, PubMed Central, DOAJ, Scopus, and SCIE indexed

Q2 Medical Informatics

** Highest quartile ranking in top-ranked JCR category*

JMIR Medical Informatics is a leading open-access journal dedicated to exploring the challenges and impacts of clinical informatics, the digitalization of care processes, and health data pipelines. We publish high-quality research covering everything from data acquisition and semantics to natural language processing, meaningful analytics, and robust decision support systems. Our focus extends to the development, implementation, and evaluation of electronic health records and eHealth infrastructures, making *JMIR Medical Informatics* an essential resource for understanding and advancing the technological backbone of modern healthcare.

JMIR Medical Informatics publishes applied, translational research and implementation science that influences the improvement of health care and care systems. We welcome innovative and practical research on data shareability, reusability, and interoperability, with a broad readership that includes clinicians, CIOs, engineers, industry professionals, health informatics experts, patients, and policy makers. By focusing on the practical application and impact of informatics solutions, *JMIR Medical Informatics* provides a vital platform for advancements that transform clinical practice and healthcare delivery.
