Journal of Medical Internet Research

The leading peer-reviewed journal for digital medicine and health and health care in the internet age.

Open access | Peer reviewed | PMC, MEDLINE, SCIE, Psycinfo, Scopus, DOAJ indexed

Q1 **Health Care Sciences & Services**   **Q1** **Medical Informatics**   ** Highest quartile ranking in top-ranked JCR category*

The *Journal of Medical Internet Research* is the pioneer open access eHealth journal and the flagship journal of JMIR Publications. As the leading peer-reviewed journal for digital medicine and health in the internet age, *Journal of Medical Internet Research* focuses on research involving emerging technologies, medical devices, apps, engineering, telehealth, and informatics applications. This includes innovative studies on their use for patient education, disease prevention, population health initiatives, and clinical care. The *Journal of Medical Internet Research* publishes original research, viewpoints, and comprehensive reviews, including literature reviews and evaluations of medical devices, technologies, and applications.

Established in 1999, *Journal of Medical Internet Research* is the premier international peer-reviewed journal at the forefront of digital health, data science, health informatics, and emerging technologies for health, medicine, and biomedical research. As the first open-access journal in health informatics and the top-ranked journal in 'Medical Informatics' on Google Scholar, *Journal of Medical Internet Research* stands apart by focusing broadly on eHealth and digital health—a highly interdisciplinary field encompassing mobile health (mHealth), consumer health informatics, and participatory medicine.
