Online Journal of Public Health Informatics

A leading peer-reviewed, open access journal dedicated to the dissemination of high-quality research and innovation in the field of public health informatics.

Open access | Peer reviewed | PubMed, PubMed Central (PMC), DOAJ, Sherpa/Romeo, WoS Core Collection: ESCI and Scopus indexed

The *Online Journal of Public Health Informatics* focuses on high-quality research and innovation in the field of public health informatics. *Online Journal of Public Health Informatics* aims to promote the application of informatics to improve public health research, education, and policy. The journal welcomes articles on a broad range of topics, including the use of health information and communication technology (ICT) for disease prevention and health promotion, and the development and implementation of electronic health records by public health agencies.

Online Journal of Public Health Informatics seeks to promote interdisciplinary collaboration, welcoming contributions from researchers and practitioners across public health, computer science, data science, health informatics, and related disciplines. The journal covers the framework, evaluation, and use of health information exchange technologies, the application of data analytics in public health practice, and the evaluation of mobile health technology and digital platforms. It also explores the integration of Social Determinants of Health using ICT, the ethical, legal, and social implications of public health informatics, and the analysis of Big Data for health promotion and health equity.

Submitting the paper to JMIR Publications was the easiest one could expect a thorough process to be. The reviewers were hard but fair and without question, added clarity and value to the paper. We will definitely publish our follow up paper in JMIR and recommend this journal to other researchers.

– Christopher Dyer,
Reinecker District Health Authority
