JMIR Diabetes

Emerging technologies, medical devices, apps, sensors, and informatics to help people with diabetes

Open access | Peer reviewed | Indexed in PubMed, PubMed Central, DOAJ, Scopus, and Web of Science (ESCI)

JMIR Diabetes is an open access PubMed/ESCI indexed journal of JMIR Publications, the leading open access publisher in health informatics. *JMIR Diabetes* focuses on technologies, medical devices, apps, engineering, informatics, and patient education for the prevention, self-management, care, and potential cure of diabetes.

JMIR Diabetes publishes original research, viewpoints, and reviews, covering wearable devices and trackers, mobile apps, glucose monitoring, telemedicine, web-based diabetes education and eLearning, innovations for patient self-management, diabetes-specific EHR improvements, clinical or consumer-focused software, diabetes epidemiology and surveillance, etc.

ⓘ As an open access journal, *JMIR Diabetes* is read by clinicians and patients alike and, like all JMIR Publications journals, has a focus on readable and applied science that reports on on the design and evaluation of health innovations and emerging technologies.
